MISSION STATEMENT

Our mission is to be the leading long-term supplier to industrial customers of specialized services that primarily involve stabilization and/or landfilling of environmentally sensitive waste or by-products, transportation, laboratory and brokering services. To the extent possible, these services will be interfused to meet our customer's waste management needs. Our success will be achieved by building on our reputation for reliability, technical expertise, and responsiveness to our customer's needs.

ENVIROSAFE

ENVIROSAFE SERVICES OF OHIO, INC.

A RCRA SUBTITLE C TREATMENT AND DISPOSAL FACILITY

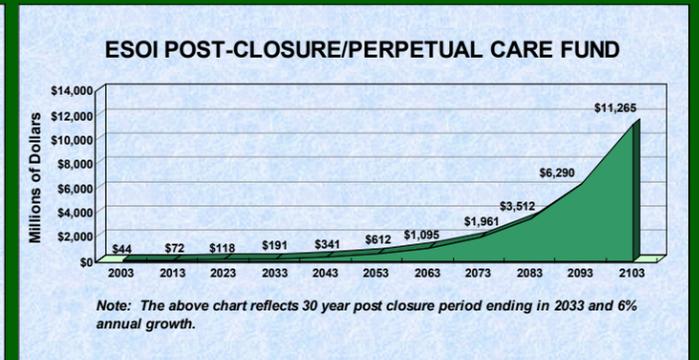

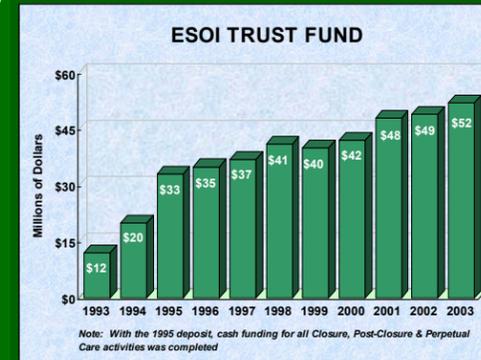

Serving Industry and the Environment

About Our Business.... EnviroSAFE Services of Ohio, Inc. (ESOI) is a fully permitted hazardous waste treatment and disposal facility with both state and federal Part B permits, occupying approximately 133 acres in an industrialized area of Oregon, Ohio. EnviroSAFE supplies customers with specialized expertise in stabilization and landfilling of environmentally sensitive wastes and by-products.

EnviroSAFE utilizes a patented treatment process called Super Detox® to treat electric arc furnace (EAF) dust, a hazardous waste collected in the air pollution control system of steel "mini-mills". EnviroSAFE is a leading provider for the management of EAF dust in the country. EnviroSAFE also continues to use its experience and knowledge to provide stabilization treatment and disposal services to incinerators, waste consolidators, and multi- and single- source generators.

Flexibility and Convenience.... ESOI offers a fully enclosed, high-capacity waste treatment facility with specialized equipment and processes which effectively and efficiently handle hazardous solids, sludges, soils, dusts, powders, slag, concrete, and debris. In addition to treatment services, ESOI offers RCRA Subtitle C landfill capacity to manage your long-term disposal requirements, analytical services, transportation and brokering services. ESOI is permitted to accept an extensive list of US EPA waste codes and waste types and is CERCLA approved. We accept waste by truck or rail, and in a wide variety of shipping containers. In fact, ESOI is the only commercial hazardous waste landfill with direct rail access into the facility.

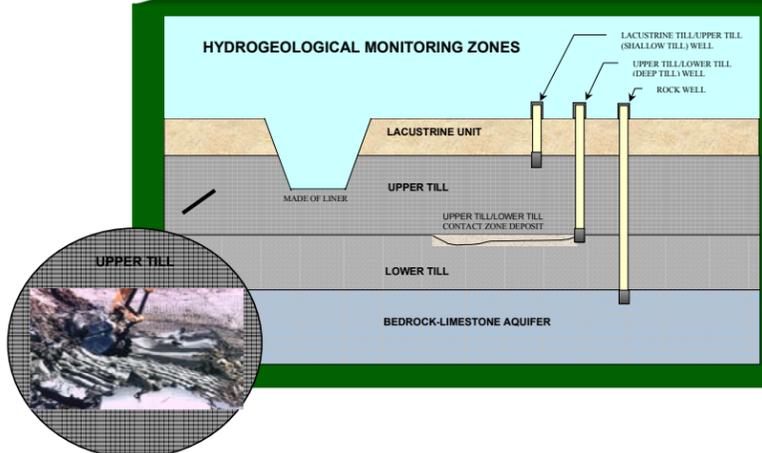

Exceptional Design.... ESOI's location is exceptional due to its excellent geology, which includes thick layers of dense clays with very low permeability. Disposal cells are designed with redundant protective systems, including two synthetic liners, a leachate collection system and a leak detection system. ESOI monitors the facility by using an extensive system of groundwater wells located around the perimeter of the site.

Unmatched Liability Protection.... Our liability protection is like no other in the industry. ESOI utilizes a unique combination of standard post-closure funding supplemented by an additional Perpetual Care Fund, which ensures the availability of funds beyond the standard thirty year post-closure period mandated by US EPA regulations. The combined closure, post-closure, and perpetual care trust fund has over \$52 million in cash, and will grow to hundreds of millions of dollars. For example, in just 20 years the fund balance will exceed 100 million dollars. This funding strategy, combined with ESOI's excellent compliance and safety records, natural geology and hydrogeological characteristics, and the impressive high-technology design of our facility, offers what we believe to be environmental stewardship and long-term, liability protection that is unsurpassed in the industry.

Excellent Service.... Many claim to have it, but ESOI delivers. You will receive personalized service from the first day, with a Sales Account Manager and customer service representative assigned specifically to your account to assist you in all aspects of our business. We work hard to understand the needs of our customers, and strive to be a partner in managing your waste from initial classification to determining the impact of a new regulation. Assistance is always one call away.

The Best Choice.... ESOI offers competitive pricing and value-added services that exceed your expectations. We believe that ESOI's comprehensive long-term liability protection, our proven waste management expertise, and our commitment to premium services combine to offer ESOI as the best choice available for your waste treatment and disposal needs. We encourage and welcome any questions you may have concerning our facility or our service offerings.

- ### SERVICES PROVIDED
- ❖ Stabilization-Treatment – Metal and Sulfide Bearing Waste(s)
 - ❖ Disposal - Hazardous/Non-hazardous/Industrial/Solid Waste(s)
 - ❖ Size Reduction (Two Phase Crusher)
 - ❖ Microencapsulation-Treatment - Hazardous Debris
 - ❖ Macroencapsulation-Treatment - Hazardous Debris
 - ❖ Disposal - Nonregulated (<50ppm) PCB Waste(s)
 - ❖ Disposal - Friable and Non-friable Asbestos
 - ❖ Laboratory Services
 - ❖ Transportation Services
 - ❖ Brokering Services
